A Partial Bibliography on Management of Non-Game Birds in the Southeast, 1960-1980

James G. Dickson, Wayne R. Marion, William C. McComb, and John J. Moriarty

INTRODUCTION

The objective of this publication is to provide a ready source of references related to management of non-game birds in the South. This should be helpful to those in early stages of management of non-game birds. This publication was sponsored by the Non-game Committee of the Southeastern Section of The Wildlife Society.

All references with publication dates from 1960 to 1980 were taken from Wildlife Review. Subject categories included were:

1. Wildlife — General; Faunas, natural history, manuals; Population dynamics; Management non-game; Wetlands and wildlife; Forests and wildlife; Environmental impacts and assessments.

2. Birds — General; Faunas, communities, manuals; Population dynamics; Economics, damage, predation, control; Waterbirds; Loons and grebes; Shorebirds, marshbirds and allies; Raptors; Passerine birds; General; Blackbirds, starlings, crows; Other passerine birds; Other birds.

References not pertaining to management and references of game birds, threatened and endangered species, and pesticides and pollution were omitted to avoid too broad a scope and duplication with other bibliographies.

The geographical area covered is the southeastern United States, bordered by Virginia, West Virginia, Kentucky, Missouri, East Oklahoma, and East Texas. A few general articles from outside this range but appropriate to bird management in the South are included.

References are arranged alphabetically by author. A subject index is included to facilitate location of references.

James G. Dickson is Supervisory Research Wildlife Biologist, Wildlife Habitat and Silviculture Laboratory, maintained in cooperation with the School of Forestry, Stephen F. Austin State University, Southern Forest Experiment Station, Forest Service — USDA, Nacogdoches, Texas. Wayne R. Marion is Associate Professor of Wildlife Ecology, School of Forest Resources and Conservation, University of Florida, Gainesville. William C. McComb is Assistant Professor and John J. Moriarty is Graduate Assistant in the Department of Forestry, University of Kentucky, Lexington.
