

Supplementary File

Southeastern Naturalist

office@eaglehill.us

www.eaglehill.us/sena

**Online Supplementary File 1 to: Adams, S.B., and R.L. Jones. 2021.
Crayfishes of Mississippi: A provisional checklist with distributions and
discussion of unresolved taxonomic issues *Southeastern Naturalist* 20(1):51–
76.**

Note: the content of supplementary files is not subject to proof editing by the journal staff. Thus, the responsibility for the accuracy of all information and correctness of its presentation in this file lies solely with the author(s).

Supplemental File 1. Crayfish species list by Mississippi county. A “?” indicates that either (1) all specimens of a taxon from a county were only tentatively identified as that taxon or (2) we have reason to question whether the taxon actually occurs in the county. Some species occurrences reflected as questionable in Table 3 may not be indicated as questionable here because counties and HUCs do not align. We only retained genus level records if there were no specimens of the genus identified to species in the county. In most instances where a subspecies was recorded, other similar specimens were recorded only to the species level; however, only the subspecies was listed here.

¹ Identification from Glon et al. 2019.

² The only record of the species from Panola County was of a form I male from a 1967 collection. The specimen was designated as a paratype. Extensive recent sampling by the USFS in Orr/Oil Creek produced no *F. hartfieldi*, so the species may have been extirpated from the stream.
