Forests of Oklahoma, 2018

Oklahoma has an estimated 11,839,461 acres of forest land.

* Percent forest is forest area/total area. Percent forest with water removed from total area is 27%.

This resource update is a brief look at some of the basic metrics that describe the status of and changes to forest resources in Oklahoma. This information is based on field data collected using the USDA Forest Service Forest Inventory and Analysis (FIA) annualized sample design, and it is updated yearly.

Oklahoma has 7,272 sample plots across the State, of which 2,354 are currently forested. Each year, about 10-20 percent of these plots are visited and measured by field crews. Data used in this update were accessed from the FIA database on 09/23/2020.
