Florida has an estimated **16,942,748** acres of forest land.
*Percent forest is forest area/total area. Percent forest with water removed from total area is 49%.*

This resource update is a brief look at some of the basic metrics that describe the status of and changes to forest resources in Florida. This information is based on field data collected using the USDA Forest Service Forest Inventory and Analysis (FIA) annualized sample design, and it is updated yearly.

Florida has 7,023 sample plots across the State, of which 3,245 are currently forested. Each year, about 10-20 percent of these plots are visited and measured by field crews. Data used in this update were accessed from the FIA database on 06/02/2022.
