

Timber Product Output and Use Kentucky, 2020

Kentucky forests accounted for a total of 151,663 thousand cubic feet (MCF) of timber products while the forest products industry produced a total of 184,915 MCF within the State.

This resource update contains the findings of a survey conducted on a sample of all primary wood-using mills in Kentucky. It complements the Forest Inventory and Analysis (FIA) annual inventory of volume and removals. The survey was conducted to determine the amount and source of wood receipts and annual timber product imports/exports. Only primary wood-using mills were surveyed. Primary mills are those that process roundwood in log or bolt form or as chipped roundwood. Examples of industrial roundwood products are saw logs, pulpwood, veneer logs, poles, and logs used for composite board products. Mills producing products from residues generated at primary and secondary processors were not surveyed. Data used in this update were accessed from the FIA Timber Product Output database (see back page).

- Biomass/energy plant
- ▲ Misc - Concentration/export yard
- ◁ Miscellaneous mill
- + Post mill
- * Pulp/Paper mill
- ▽ Saw mill (includes coop/stave, handle)
- ▷ Veneer/plywood mill
- Hardwood
- Hardwood/Softwood
- Softwood

Kentucky had a total production of 151,663 MCF in 2020.

There are about 232 primary wood processing mills accounting for production in the State.

Statewide roundwood production (% of total) by product

Saw logs	80.31%	■
Miscellaneous	15.86%	■
Bioenergy/Fuelwood	3.83%	■

*Misc. includes all roundwood uses not listed

Kentucky imported 42,308 MCF into the State and exported 9,057 MCF out of the State making them a net importer of roundwood.

Total roundwood production over time

■ Max. Hardwood .. ■ Max. Softwood P..
