Timber Product Output and Use Louisiana, 2021

Louisiana forests accounted for a total of 657,954 thousand cubic feet (MCF) of timber products while the forest products industry produced a total of 718,804 MCF within the State.

This resource update contains the findings of a survey conducted on a sample of all primary wood-using mills in Louisiana. It complements the Forest Inventory and Analysis (FIA) annual inventory of volume and removals. The survey was conducted to determine the amount and source of wood receipts and annual timber product imports/exports. Only primary wood-using mills were surveyed. Primary mills are those that process roundwood in log or bolt form or as chipped roundwood. Examples of industrial roundwood products are saw logs, pulpwood, veneer logs, poles, and logs used for composite board products. Mills producing products from residues generated at primary and secondary processors were not surveyed. Data used in this update were accessed from the FIA Timber Product Output database (see back page).

Louisiana had a total production of 657,954 MCF in 2021.

There are about 43 primary wood processing mills accounting for production in the State.

Statewide roundwood production (% of total) by product

- Pulpwood: 43.94%
- Veneer logs: 22.48%
- Saw logs: 21.08%
- Miscellaneous: 7.69%
- Bioenergy/Fuelwood: 3.78%
- Poles/Posts/Pilings: 1.03%

*Misc. includes all roundwood uses not listed

Total roundwood production over time

Louisiana imported 144,075 MCF into the State and exported 83,225 MCF out of the State making them a net importer of roundwood.
Timber Product Output and Use for Louisiana, 2021
