Mississippi forests accounted for a total of 935,410 thousand cubic feet (MCF) of timber products while the forest products industry produced a total of 670,074 MCF within the State.

This resource update contains the findings of a survey conducted on a sample of all primary wood-using mills in Mississippi. It complements the Forest Inventory and Analysis (FIA) annual inventory of volume and removals. The survey was conducted to determine the amount and source of wood receipts and annual timber product imports/exports. Only primary wood-using mills were surveyed. Primary mills are those that process roundwood in log or bolt form or as chipped roundwood. Examples of industrial roundwood products are saw logs, pulpwood, veneer logs, poles, and logs used for composite board products. Mills producing products from residues generated at primary and secondary processors were not surveyed. Data used in this update were accessed from the FIA Timber Product Output database (see back page).

Mississippi had a total production of 935,410 MCF in 2021.

There are about 81 primary wood processing mills accounting for production in the State.

Statewide roundwood production (% of total) by product

- Pulpwood: 45.64%
- Saw logs: 37.14%
- Veneer logs: 6.59%
- Bioenergy/Fuelwood: 5.34%
- Miscellaneous: 5.29%

*Misc. includes all roundwood uses not listed

Total roundwood production over time

Mississippi imported 41,139 MCF into the State and exported 306,475 MCF out of the State making them a net exporter of roundwood.
Timber Product Output and Use for Mississippi, 2021

Timber Product Output
The National Timber Product Output (TPO) section of the FIA program collects and reports estimates of industrial and nonindustrial uses of roundwood. Details of the TPO section and TPO data can be found here: https://www.fia.fs.fed.us/program-features/tpo
