Arkansas forests accounted for a total of 654,117 thousand cubic feet (MCF) of timber products while the forest products industry produced a total of 668,403 MCF within the State.

This resource update contains the findings of a canvass of all primary wood-using plants in Arkansas. It complements the Forest Inventory and Analysis (FIA) annual inventory of volume and removals. The canvass was conducted to determine the amount and source of wood receipts and annual timber product imports/exports. Only primary wood-using mills were canvassed. Primary mills are those that process roundwood in log or bolt form or as chipped roundwood. Examples of industrial roundwood products are saw logs, pulpwood, veneer logs, poles, and logs used for composite board products. Mills producing products from residues generated at primary and secondary processors were not canvassed. Data used in this update were accessed from the FIA Timber Product Output database (see back page).

Arkansas had a total production of 654,117 MCF in 2017.

There are about 109 primary wood processing mills accounting for production in the State.

Statewide roundwood production (% of total) by product:
- Saw logs: 46.16%
- Pulpwood: 42.21%
- Veneer logs: 4.89%
- Miscellaneous: 3.40%
- Bioenergy/Fuelwood: 3.14%
- Poles/Posts/Pilings: 0.20%

Total roundwood production over time:

Arkansas imported 97,669 MCF into the State and exported 83,383 MCF out of the State making them a net exporter of roundwood.
Timber Product Output and Use for Arkansas, 2017

Timber Product Output
The National Timber Product Output (TPO) section of the FIA program collects and reports estimates of industrial and nonindustrial uses of roundwood. Details of the TPO section and TPO data can be found here: https://www.fia.fs.fed.us/program-features/tpo/
