Subject: Acknowledge Unsustainable Timber Industry in SFRA

Dear Mr. Sargent,

I oppose any harvesting of our national Forests. The natural deforestation of drought, ice storms, fire, etc. is enough. The paper industry has told us that they do not need the lumber from the forests and that only five percent of their harvest comes from the forest. There are other resources for the paper and lumber industries and to the industries associated with these particluar industries. Neither should the oil, coal, or gas industires need the resources from our national lands. They also have other resources. Even if they tell you other wise. I was a chemist in the oil industry and they do have other options.

Thank you & God bless!  
Sincerely,

Rev. Robert Laremore
